DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

New Matter Rejection

The amendment filed 11/19/04 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The arrangement of the device including how one part is connect to the other part is new matter recited in claim 22. For example, in claim 22, it is stated that a 1) cylinder is secured to an aerosol can communicating with a pressurized product, 2) a hollow piston forming a nozzle and adapted to reciprocate within said cylinder and a needle adapted to engage against an inner surface of the piston. The connections are not clear to the Examiner and do not appear to be supported by the instant specification. Likewise, connections for the other portions of the device (pressure chamber, spring means) appear to lack support in the instant specification. For this reason, claim 22 is rejected.

Applicant is required to cancel the new matter in the reply to this Office Action.
